SUMMARY

Backend engineer with five years of experience building Python APIs, data pipelines and cloud deployments. Comfortable owning services from design to production support.

SKILLS

Python, FastAPI, Django, PostgreSQL, Redis, Docker, AWS, GitHub Actions, CI/CD, Git, REST API, JWT, OAuth, PyTest, Linux, SQL, ETL, Monitoring, JavaScript, React

EXPERIENCE

Senior Software Engineer, Example Payments (2022 - present)

- Led a team of four building REST APIs in Python and FastAPI for invoicing and payouts.
- Designed PostgreSQL schemas and tuned queries, cutting p95 latency from 900 ms to 180 ms.
- Moved services to Docker on AWS ECS with GitHub Actions CI/CD and blue-green deploys.
- Added Redis caching and background workers for report generation.
- Introduced code review guidelines and PyTest coverage targets for the team.

Software Engineer, Example Logistics (2020 - 2022)

- Built Django services for shipment tracking used by 300 warehouse staff.
- Wrote ETL jobs in Python that load partner data into PostgreSQL every hour.
- Set up monitoring dashboards and on-call alerts for the tracking pipeline.
- Mentored two interns on Git workflows, testing and debugging.

Junior Developer, Example Studio (2019 - 2020)

- Maintained JavaScript and React pages for client websites.
- Wrote SQL reports for the sales team and automated them with Python scripts.

PROJECTS

• Open-source contributor to a FastAPI authentication plugin (JWT and OAuth support).
• Built a personal finance tracker with Django, PostgreSQL and Chart.js.
• Wrote a command-line log analyser in Python with unit tests and type hints.

EDUCATION

B.E. Computer Engineering, Example Institute of Technology (2015 - 2019)

CERTIFICATIONS

AWS Certified Developer - Associate (2023)
