Vikram Rao

Project 1: Inventory Module Version 1

Worked on release 1 of a warehouse system written in Java and Spring Boot.
Added REST endpoints, wrote JUnit tests and reviewed code from two teammates.
Tracked tasks in Jira and followed Scrum with two-week sprints.

Project 2: Inventory Module Version 2

Worked on release 2 of a warehouse system written in Java and Spring Boot.
Added REST endpoints, wrote JUnit tests and reviewed code from two teammates.
Tracked tasks in Jira and followed Scrum with two-week sprints.

Project 3: Inventory Module Version 3

Worked on release 3 of a warehouse system written in Java and Spring Boot.
Added REST endpoints, wrote JUnit tests and reviewed code from two teammates.
Tracked tasks in Jira and followed Scrum with two-week sprints.

Project 4: Inventory Module Version 4

Worked on release 4 of a warehouse system written in Java and Spring Boot.
Added REST endpoints, wrote JUnit tests and reviewed code from two teammates.
Tracked tasks in Jira and followed Scrum with two-week sprints.

Project 5: Inventory Module Version 5

Worked on release 5 of a warehouse system written in Java and Spring Boot.
Added REST endpoints, wrote JUnit tests and reviewed code from two teammates.
Tracked tasks in Jira and followed Scrum with two-week sprints.

Project 6: Inventory Module Version 6

Worked on release 6 of a warehouse system written in Java and Spring Boot.
Added REST endpoints, wrote JUnit tests and reviewed code from two teammates.
Tracked tasks in Jira and followed Scrum with two-week sprints.
